GUIDELINES

1. CAUTION: This inventory list does not contain all controlled substance medications available, only some of the more commonly used and marketed at the time of publication.

2. It is the responsibility of each registrant to list and inventory all controlled substances in stock at the appropriate times whether or not they have been included in this booklet.

3. The normal inventory date is May 1st ANNUALLY for ALL Controlled Substances. Any deviation from the May 1st date of the inventory requires notification of the Drug Enforcement Administration of a new "fixed" date and approval of the Arizona State Board of Pharmacy. *

4. When a medication is added to the controlled substance list, that product will be inventoried on the date the rule becomes effective.

5. If the inventory is taken during "open hours" of the pharmacy, inventory quantities shall be adjusted to reflect actual quantities on hand at either the "open" or "close" of business of the date of inventory.

6. Exact counts shall be made on all CII medications.

7. CIII, CIV and CV counts may be estimated if bottle size is for 1000 dosage units or less.

8. In addition to the normal May 1st inventories required, a full inventory of ALL Controlled Substance medications shall be accomplished:
   a. within 10 days of assumption of Pharmacist-in-Charge duties,
   b. immediately upon change of ownership of a pharmacy, and
   c. as part of the procedures for closing a pharmacy.

9. All losses of controlled substance medications shall be reported pursuant to R4-23-1003(A)(3).

10. This booklet is supplied complimentary by the Arizona State Board of Pharmacy for the convenience of the registrant. It is the responsibility of the registrant to remain aware of current laws and regulations affecting the inventory process and when a conflict exists between this booklet and Federal or State laws, the laws shall prevail.

* Pursuant to A.R.S. § 36-2523 (B) (1994)
