### OPTION #1

Partial fee for all licenses and permits (Fee to be discussed)

If you are issued a license between November 1, 2017 and October 31, 2018. You are an 18. You are required to renew by October 31, 2018 and are on an even cycle.

If you are issued a license between November 1, 2018 and October 31, 2019. You are a 19. You are required to renew by October 31, 2019 and are on an odd cycle.

And the Technician trainee fee to be \$50 for one time 3 year license. This does not include the wall certificate.

### OPTION #2:

Full fee for all licenses and permits.

If you are licensed/permitted from November of an odd year to October of an even year, you will follow an odd year renewal cycle.

Example: XXXXX – 17

If you are licensed/permitted from November of an even year to October of an odd year, you will follow an even year renewal cycle.

Example: XXXXX – 18

This way they get their license/permit for at least 1 year and maximum of 2 years. This is also will go along with what I mentioned to the legislatures about doing away with having to turn around and renew right away.

And the Technician trainee fee to be \$50 for one time 3 year license. This does not include the wall certificate.

**\*pharmacy technician trainee licensed prior August 10, 2018 shall be allowed to reapply one additional time only prior to the expiration date of the initial pharmacy technician trainee license and only if the pharmacy technician trainee license was the initial license. A reapply fee of \$36 will be charged. Pharmacy technician trainee license if expired cannot reapply after August 9, 2017.**
